U.S. Citizen | Eligible for Secret Clearance

SUMMARY

Cybersecurity student at Old Dominion University and Security+ holder seeking a SOC Analyst role. Hands-on experience monitoring and triaging alerts through ODU's Student SOC.

EDUCATION

Old Dominion University Norfolk, VA
B.S. in Cybersecurity, Minor in Political Science | GPA: 3.49 Expected December 2027
Relevant Coursework: Cyber Strategy & Policy, Intro to Networking & Security, Cybercriminology, Cyber Law, Linux Systems for Cybersecurity.

CERTIFICATIONS

CompTIA Security+ (SY0-701) August 2026
CCNA (200-301) (In Progress) Expected January 2027

TECHNICAL SKILLS

Security Tools: CrowdStrike, QRadar, Microsoft Defender, Wireshark, Nmap, Snort
Systems & Networking: Linux, Windows Server, Active Directory, TCP/IP, VLANs, firewalls
Scripting & Other: Python, Bash, PowerShell, SQL

EXPERIENCE

Student Security Analyst August 2026 – Present
Old Dominion University Norfolk, VA

- Monitor and triage endpoint detections in CrowdStrike Falcon, identifying suspicious software installs across faculty workstations and escalating per SOC procedures
- Investigate risky-user sign-ins in Microsoft Entra ID and IBM QRadar SIEM, using KQL and log correlation to separate compromised accounts from false positives
- Analyze reported phishing emails through PagerDuty incident workflows, documenting findings and resolving tickets against MTTA and MTTR performance targets

Guest Advocate August 2025 – Present
Target (Store #2203) Chesapeake, VA

- Resolve escalated guest issues at the service desk, including returns, fraud-sensitive transactions, and policy exceptions, while following strict verification procedures
- Handle high-volume, time-sensitive requests calmly, a direct parallel to incident queues in a SOC
- Trained new team members, handled cash office tasks, and helped lead team at times

CyberAI Camp Instructor July 2026
Old Dominion University Norfolk, VA

- Designed and delivered a full week of instruction on AI and cybersecurity, including sessions on how attackers use AI, hands-on phishing labs, and AI model training
- Built all course materials: slide decks, speaker scripts, and interactive Jeopardy games with a live Firebase buzzer system
- Explained technical concepts to non-technical audiences, earning a faculty recommendation to join the ODU Student SOC

Stagehand September 2026 – Present
IATSE Local #285 Virginia Beach, VA

- Execute load-ins, set changes, and strikes for live productions, following cue calls and safety protocols under tight time constraints
- Dispatched to live productions at The Dome and Veterans United Home Loans Amphitheater for concerts
